

MWE Bare Truck Skid

(please measure your truck bed as shown in the picture above)

*all TIG welded aluminum by expert Midwest Washing Equipment fabricators

*in house CAD design, weldment and shop print production

*full frame design for additional support and security (no formed panels or sheet metal)

*full frame fork pockets for added support and safety during loading and unloading

*full frame shelves are self supporting which results in no flex/bounce while not relying on the truck bedside for support

*narrower shelves are well within NTSB vehicle width guidelines while fitting all popular hose reel manufacturers

*base is 48" wide, shelf height is 22" from bed floor to underside of shelf
